

Our Brilliant Year in Year 1!

Literacy – We have been focusing on improving our sentences and learning how to join our handwriting. We have also enjoyed writing our own fairy tales and pattern poetry.

Maths – We have enjoyed consolidating our measuring skills. We used lots of different equipment to measure a variety of objects

Science – We thoroughly enjoyed celebrating our learning on 'Animals including Humans', with a trip to Paradise Wildlife Park. We have also had great fun growing lots of different plants and predicting what will happen.

During our science week we were able to explore different sounds that instruments make and how we make them, density of different liquids and mini beast hunting!

Design and Technology and Art – We have had a brilliant time making puppets, designing and creating vehicles, sculpting our lions and producing our camouflage chameleon! Not forgetting our class project – Leo the Lion!

RE – We have been finding out about how Jewish people have a special day from sunset Friday until sunset Saturday. This is called Sabbath. We also thought about what days were special to us.

Computing – We have had great fun creating branching databases to help sort and classify the escaped monsters. We have also been discovering Algorithm and have enjoyed programming our robots.
